

OPAL

Pre Production Approval Activities Tracker

GAP INC.

IndigoX

The Five Key Changes

One OPAL tracker replaces category trackers, Excel, and email for every department involved.

Base order data now flows automatically from Centric PLM into OPAL.

Direct, real-time updates replace the double-layered email relay.

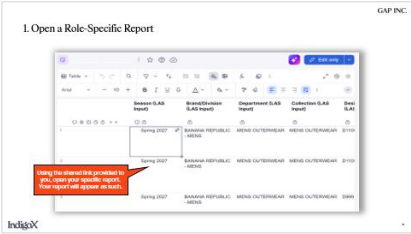

Power BI dashboard refreshes daily, straight from OPAL — no manual compilation.

A standardized pass/fail audit column replaces ad hoc, email-based tracking.

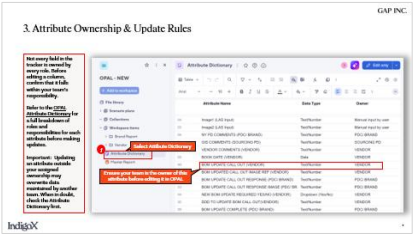

Contents

1. Open a Role-Specific Report

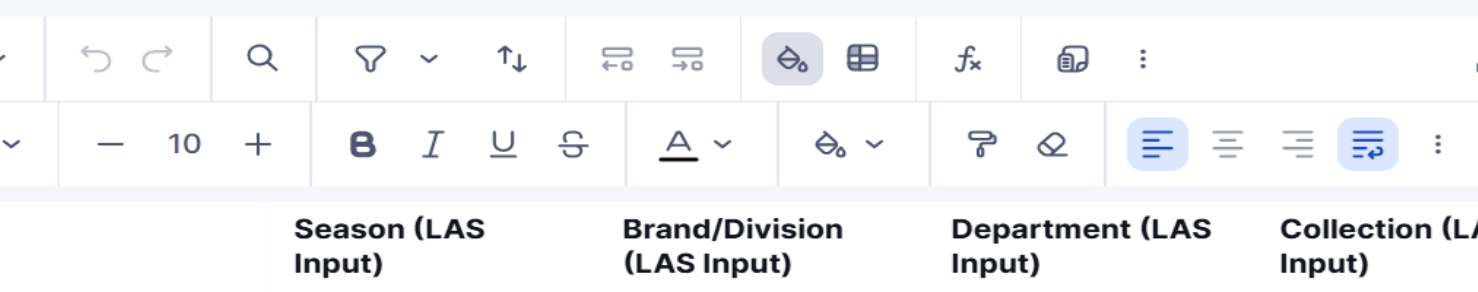

2. Add Filters and Update Records

Attribute Ownership & Update Rules

1. Open a Role-Specific Report

	Season (LAS Input)	Brand/Division (LAS Input)	Department (LAS Input)	Collection (LAS Input)	Design (LAS Input)
1	Spring 2027	BANANA REPUBLIC - MENS	MENS OUTERWEAR	MENS OUTERWEAR	D1109
2	Spring 2027	BANANA REPUBLIC - MENS	MENS OUTERWEAR	MENS OUTERWEAR	D1109
3	Spring 2027	BANANA REPUBLIC - MENS	MENS OUTERWEAR	MENS OUTERWEAR	D999

Using the shared link provided to you, open your specific report. Your report will appear as such.

2. Add Filters and Update Records

1 Select Filter icon

2 Select the + icon

3 Select target column

4 Select filter criteria

5 Select relevant values

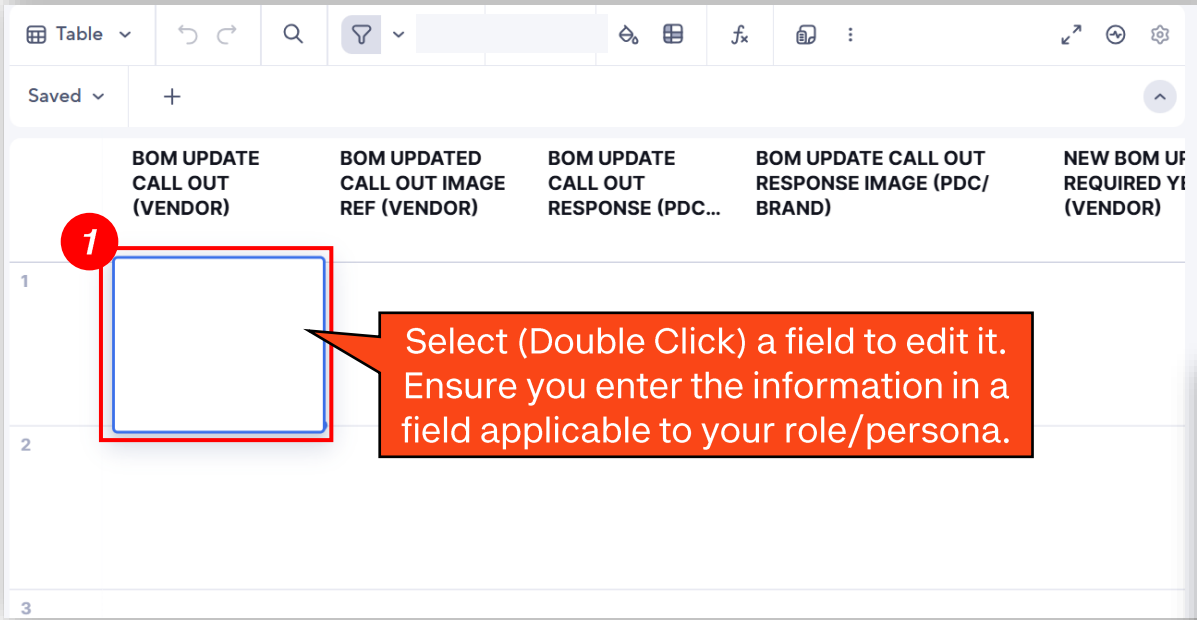

6 Select Save. The Save Filter modal window will popup.

7 Name your filter

8 Select Save

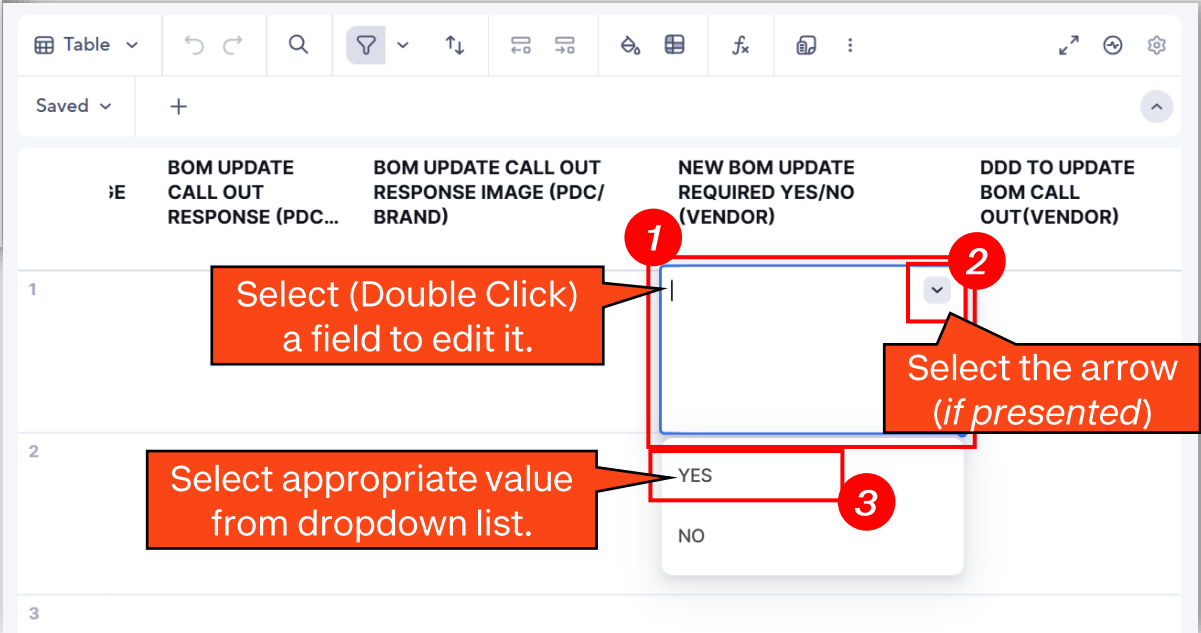

The interface shows a list of columns including Season (LAS Input), Brand/Division (LAS Input), Collection (LAS Input), Design Number (LAS Input), Design Name (LAS Input), BOM Number (LAS Input), Design BOM (LAS Input), BOM Version (LAS Input), and Status (LAS Input). The filter criteria for Brand/Division (LAS Input) is set to 'is one of' with selected values: BANANA REPUBLIC - MENS, BANANA REPUBLIC - WOMENS, GAP - BOYS, and GAP - GIRLS. The 'Save filter' modal window shows the filter named 'Brand Division & BOM Version' and the 'Save' button.

2. Add Filters and Update Records (cont.)

This screenshot shows a table with five columns. The first column is labeled '1' with a red circle. A red box highlights the first cell of the first row. A callout box points to this cell with the text: 'Select (Double Click) a field to edit it. Ensure you enter the information in a field applicable to your role/persona.'

3					

This screenshot shows a table with four columns. The first column is labeled '1' with a red circle. A red box highlights the first cell of the first row. A callout box points to this cell with the text: 'Select (Double Click) a field to edit it.' Another red box highlights the dropdown arrow in the first cell of the first row. A callout box points to this arrow with the text: 'Select the arrow (if presented)'. A third red box highlights the 'YES' option in the dropdown list. A callout box points to this option with the text: 'Select appropriate value from dropdown list.'

	BOM UPDATE CALL OUT RESPONSE (PDC...	BOM UPDATE CALL OUT RESPONSE IMAGE (PDC/ BRAND)	NEW BOM UPDATE REQUIRED YES/NO (VENDOR)	DDD TO UPDATE BOM CALL OUT(VENDOR)
1				
2			YES	
3			NO	

3. Attribute Ownership & Update Rules

Not every field in the tracker is owned by every role. Before editing a column, confirm that it falls within your team's responsibility.

Refer to the OPAL Attribute Dictionary for a full breakdown of roles and responsibilities for each attribute before making updates.

Important: Updating an attribute outside your assigned ownership may overwrite data maintained by another team. When in doubt, check the Attribute Dictionary first.
